

 GeoTrust® True BusinessID Wildcard**Secure multiple host names at minimal cost.**

Whether it's your company's home page or your mail server's host name, protecting sensitive information is your goal—and it's our goal too. That's why we offer GeoTrust® True BusinessID Wildcard SSL certificates. With our True BusinessID Wildcard certificate, you get high levels of encryption and authentication for unlimited host names on an unlimited number of servers, all with one certificate. You also get the dynamically date stamped GeoTrust True Site Seal to display so your web site visitors will know instantly that your security is current.

Give your visitors a symbol they can trust.

When you use True BusinessID Wildcard SSL certificates, you can also display the GeoTrust True Site Seal, a well-known symbol of trust. Our trustmark dynamically displays the company name, current date and time so when your customers, business partners or employees see it on your web site or subdomain, they will know that your site is legitimate, your security is current and that their sensitive information is protected.

GeoTrust True BusinessID Wildcard SSL certificates are a flexible and convenient way to extend protection across your online presence.

No time to manage SSL? No need to worry.

We want to save you time and effort so we've made it quick and convenient to manage your wildcard certificate online.

We're dedicated to helping you. Our SSL

certificates are easy to install, but if you have any questions about how to secure your subdomains, just let us know. We're the experts when it comes to SSL security, so if you need assistance, you'll get the support of trained specialists, not internet generalists.

Is True BusinessID Wildcard right for you? If you can answer yes to any of these questions, then GeoTrust True BusinessID Wildcard is the best choice for your business:

- Do you need to secure more than one subdomain (for example: *.yourdomain.com, info.yourdomain.com and shop.yourdomain.com)?
- Do you need to secure multiple applications on different subdomains (for example: webmail.website.com, secure.website.com, login.website.com)?
- Does your QA department need to scale secure applications on multiple servers for testing?

Key Benefits

- Secure all host names on a given domain with inexpensive, flexible and convenient SSL
- Show customers, business partners and employees you care about their security by getting your SSL from a reputable security company
- Protect your brand reputation by using a reliable and high-security SSL certificate
